Leader in Stretch Packaging Systems

The Multee platform automatic turntable stretch wrapper is designed for efficient and economical pallet wrapping in low to medium volume applications.

# 405B

## Muller Automatic Stretch Wrapping Machine

### SPECIFICATIONS

#### Performance

Loads per hour	40 to 50 (Operator & load dependent)
Rotation speed	16 RPM (Optional 18 rpm)
Maximum load size	54" L x 50" W
Maximum load height	80" (Optional extended heights)
Pass height	16" Top of table to floor
Maximum load diagonal	72" (Optional extended diagonal)
Maximum load weight	4,000 lbs. (Optional up to 6,000 lbs.)

#### Construction

##### Carriage lift system

Drive motor	1/2 HP 230 VAC TEFC
Drive type	Variable frequency drive
Drive control	Variable speed/dynamic braking

##### Turntable

Diameter	52"x 52" Octagonal formed plate c/w 4" skirt
----------	--

##### Turntable Rotation Drive

Drive motor	1 HP 230 VAC TEFC
Drive type	Variable frequency drive w/dynamic braking

Support	20" Ring gear with pinion gear
---------	--------------------------------

##### Frame construction

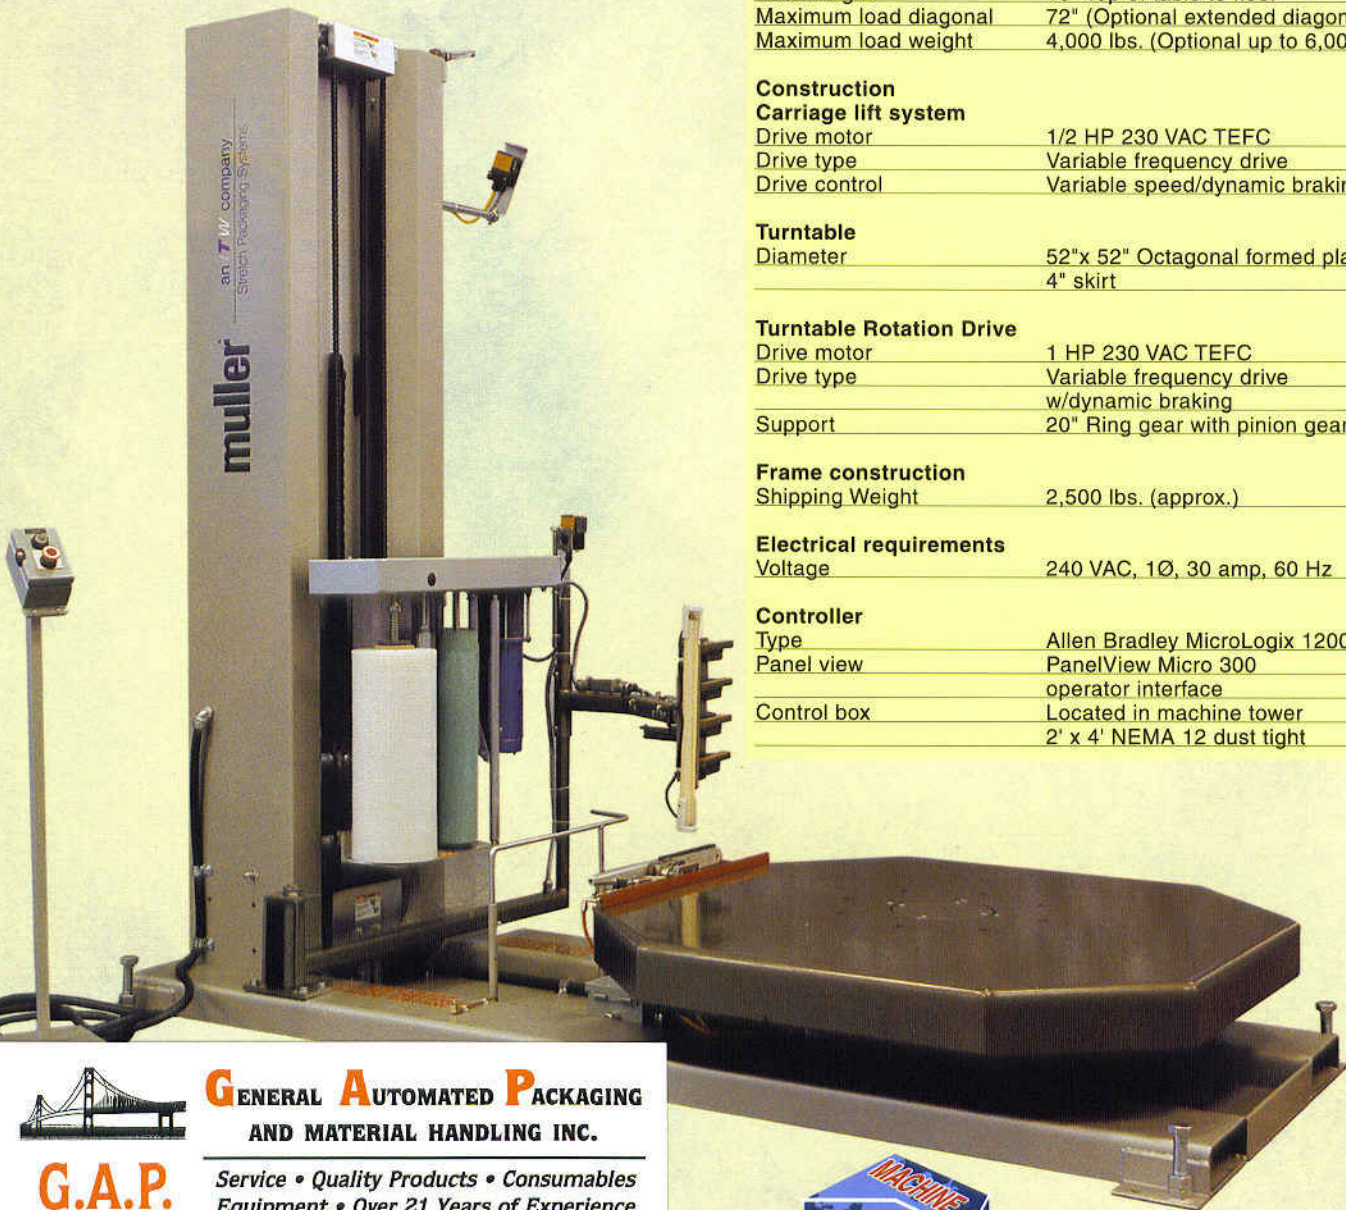

Shipping Weight	2,500 lbs. (approx.)
-----------------	----------------------

##### Electrical requirements

Voltage	240 VAC, 1Ø, 30 amp, 60 Hz
---------	----------------------------

##### Controller

Type	Allen Bradley MicroLogix 1200 PLC
Panel view	PanelView Micro 300 operator interface
Control box	Located in machine tower 2' x 4' NEMA 12 dust tight
