**ITW Muller**®
*Stretch Packaging Systems*

## semi-automatic, overhead pallet stretchwrapper

# muller multee

### The universal and flexible solution, regardless of load configuration, stability or weight

## Universal

- Pallets remain stationary during the wrap cycle.
- Adaptable to all types of loads, even unstable, heavy or light stacks.
- Automatic height load sensing is perfect for incomplete or mixed size loads.

## User Friendly

- Easy to install and operate.
- Complete and easy to use "smart" control panel.
- Three different preprogrammed wrap patterns "at your fingertips".

## Rugged and Reliable

- Built in the Muller tradition of durability and quality.
- Simple design requires little maintenance and service.
- Standard components for easy replacement.
- Few moving parts and wear components.

## Safe

- Safety system immediately stops the rotation of the arm to prevent collisions.
- Suitable for washdown or corrosive environments.

## Flexible

- Ideal for use on loading docks, rack ends and small areas.
- Mountable on a wall, column or floor.
- Designed to straddle existing conveyors, scales or AGVs.

## Economical

- Low cost easy justification.
- Equipped with the exclusive Varistretch 2000 power prestretch for optimal film usage.
- Minimizes material waste.

## Wall Mounted

## Free Standing Frame

## Standard Features

### Power Prestretch System
### Varistretch 2000

- Stretch ratios from 65% to 300%
- 20" film width
- Easy threading
- Film dancer control
- Film force tension control
- Tilted carriage to wrap within 2" from the floor
- Carriage jog control

*Design specifications subject to change without notice.*

### Rotary Arm
- 0-12 rpm (adjustable)
- Positive alignment
- Arm jog control

### Controls

#### "Smart" Panel Includes:
- Programmable controller
- 3 Selectable wrap patterns
- Separate top and bottom wrap counters
- Automatic load height sensor
- Safety system to stop the rotary arm
- Emergency Stop

## Technical Specifications

- Load size: 50" x 50"
- Maximum load height: 84"
- Weight capacity: unlimited
- Power requirements: 120 Volts, 1 phase, 60 Hz
- Shipping weight: 1300 lbs.

## Options

- Extended tower for high loads
- Extended arm for large loads
- Free standing frame (Gantry)
- Cold temperature package

## Muller: A complete range of stretchwrappers adapted to your every need!

*1991 Packaging Machinery Gold Award Winner*

**Muller Multee Automatic**
Automatic, overhead pallet stretchwrapper. The flexible solution, regardless of load configuration, stability, or weight.

**Pak-Air**
The carriage that uses normal stretch film to securely bank loads that need to "breathe".

**Concept 2000**
Rugged, semi-automatic stretchwrappers with the widest range of standard features and capabilities available.

**Muller 405, 605**
Automatic turntable stretchwrappers with heat seal pads for higher speeds.

**Muller Octopus**
A revolutionary design for automatic high speed stretchwrapping and film savings.
