

pallet stretch wrap  
equipment

---

**EC-800**

---

Founded on the principles of sound design and durability, the EC-800 offers a cost effective machine for even small quantities of loads per day. Designed for the industrial environment, the EC-800 will wrap loads up to 4,000 pounds. Turntable design on the EC-800 Series is a continuation of the field proven reliability in the Muller LP series. Therefore, regardless of how small or great your wrap requirements, Muller will manufacture a system of quality to meet your needs.

## Technical specifications

### EC-800

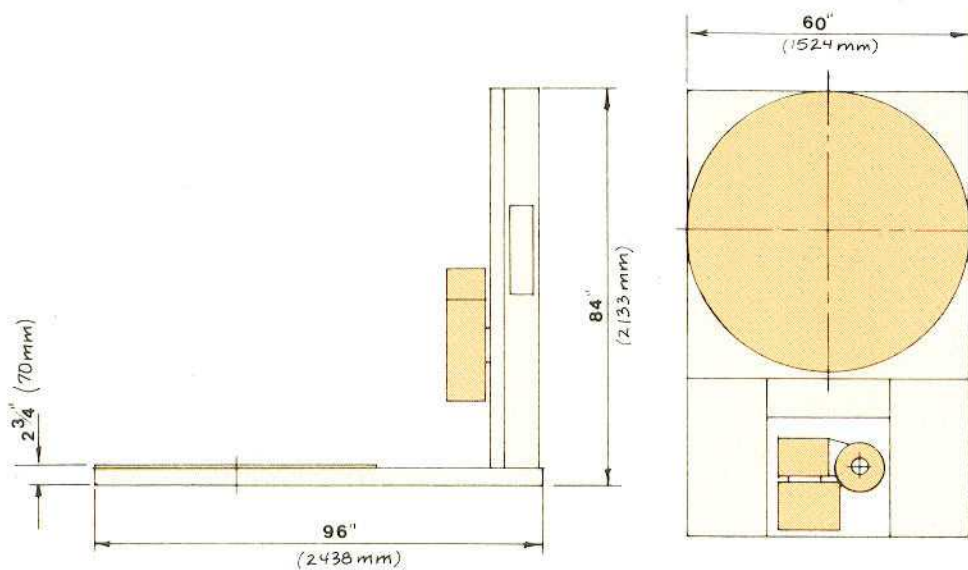

System Power: 1.5V ± .5V  
Table Drive: ½ HP TEFC Soft Start.  
Proximity sensor turntable alignment.  
#50 chain drive with spring loaded tension adjustment to 8 RPM.  
Turntable: 60" diameter × ½" Plate.  
8 point caster support.  
Self-lubricating turntable.  
Film Carriage: Dual #50 chain drive.  
⅓ HP variable speed carriage.  
Capacity: 4000 lbs. (1814.4 kg) per load.  
50"W × 50"L × 80"Height.  
Shipping Weight: 3000 lbs. (1360.8 kg)  
Ships Fully Assembled.

### STANDARD EC-800 FEATURES

- 20" Vari-Stretch Powered Pre-Stretch film delivery.
- Force to load adjustment with SCR Control.
- Fully skirted turntable.
- Fork lift portability.
- Turntable jog control.
- Printed circuit board systems control.
- Illuminated power on/off switch.
- Film carriage raise/lower switch.
- Wrap selector switch.
- Self-lubricating turntable.

### EC-800 OPTIONS

- Pallet Jack Loading Ramp.
- 90" wrap height capacity with 30" film carriage and 6 RPM turntable.
- Extended base to 120".
- Conventional film delivery.
- Dual turntable package.
- Cold temperature package.
- Automatic load height sensing
